

March 2026 CEO

Welcome Spring 2026!

As the days get warmer (with the exception of a winter storm tucked in here and there) and the sun shines longer, I'm witnessing more signs of spring every day. Not only are the birds signing louder (I guess they're glad to have the warmer days too!), but the daffodils are blooming, tulips are working their way out of the ground, and I see buds on trees and bushes. All welcomed signs we made it through winter and brighter, greener days are ahead!

At LifeSpan Resources, we are working our way through the impact of a "hard winter." We've managed to keep plowing through the heavy days, similar to the winter grind, as the state has taken business away from us and given it to the for-profit managed care companies to the detriment of our clients, their health and home-life situations.

As with the rebirth and growth of spring, we are renewing our position in the communities we serve to ensure that they have resources and services that will keep them safe and healthy. We are seeking a variety of new opportunities to best serve southern Indiana residents and do all that we can to support them.

I hope this season of growth brings not only leaves on trees, flowers in bloom, but new partnerships and opportunities to best impact all those for whom we serve.

All the best ~

Meredith
